EU SDG brochure

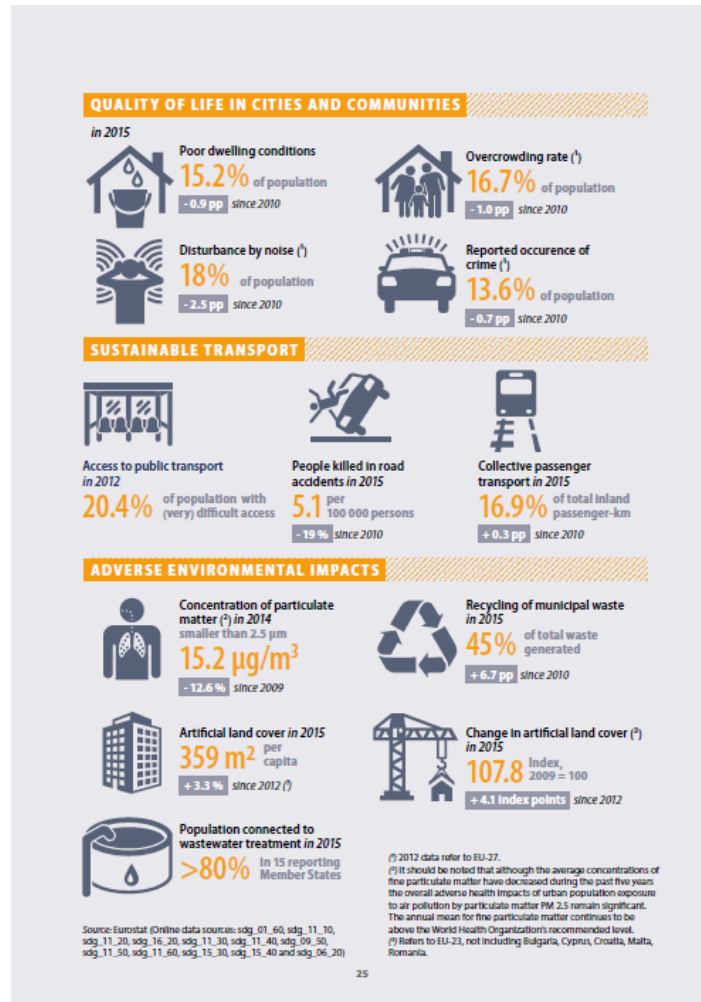

SDG 11 aims to renew and plan cities and other human settlements in a way that they offer opportunities for all, with access to basic services, energy, housing, transportation, green public spaces and others, while improving resource use and reducing environmental impacts. With sound, risk-informed and smart planning and management, SDG 11 envisions cities as environmentally resilient human settlements, which drive sustainable development, stimulate innovation and foster community cohesion and personal safety. SDG 11 calls for safeguarding the world's cultural and natural heritage and supporting positive economic, social and environmental links between urban, peri-urban and rural areas. It also stands for enhanced international cooperation and support to least developed countries for building sustainable and resilient buildings.

The EU focuses on monitoring progress in enriching the quality of life in cities and communities, in fostering sustainable transport and in alleviating adverse environmental impacts.

Next steps

- EU SDG indicator set will be reviewed for 2018, to make sure that it includes the most relevant and highest quality indicators and that it aligns with the UN global indicators as much as possible
[Ongoing refinement process until March 2018]
- 2018 EU SDG monitoring report foreseen in September
